## Read The Following Instructions Carefully In Manual Before Using The Products

- ◆ Your cooler runs on 220 volt ac, 50 hz Current. Check the house hold voltage to ensure it matches the appliance's Rate specification.
- ◆ Before operating the product remove it from packaging and check that it is in good condition
- ◆ Do not operate any product with a damage cord or plug. We recommended not using an Extension cord with the appliance.
- ◆ Do not tuck powercord under carpeting, or cover it with rugs or runners. Keep the cord Away from areas where it may be tripped over. Always unplug the product before refilling the water tank.
- ◆ Always unplug the appliance from the power source before cleaning, servicing or relocating the unit.
- ◆ Remove the power cord from the electrical receptacle by grasping and pulling on the power Cord plug- end only, never pull the cord.
- ◆ Do not use the product in areas where gasoline , paint or other flammable goods and Objects are stored.
- ◆ When using the "cool" setting, check the water tank to ensure that it is full. Operation of the Cooler on the "cool" setting with an empty tank will result in damage to the water pump.

# User Rules

---

- ◆ Do not attempt to repair or adjust any electrical or mechanical functions of the cooler As this may void the warranty.
- ◆ Do not cover the air inlet or outlet on the appliance as this may cause in motor damage.

Frequency	:	50Hz						
Wattage	:	180 watts						
Cooling media	:	Honeycomb						

## Usage Tips

---

### COOL- EFFICIENT- NATURAL

Evaporative air cooling is the natural way of cooling, similar to a breeze blowing across a lake. This breeze drops the temperature and has a relaxing cooling effect.

The evaporative air cooler cools the air by means of evaporative water. when water evaporates into the air, the result is a mixture of air and water molecules. this chemical change requires heat which is taken from the water molecules, resulting in cooler air propelled from the unit.

# Trouble Shooting Guide

---

PROBLEM	POSSIBLE CAUSES	SOLUTION
No discharge of air	cord is not plugged in	make sure power cord is plugged in and the supply switch is ON.
	Power is not on.	try to turn the unit on by pressing buttons on control panel or remote.control
Not cooling / Unit is making noise.	pump is not turned ON	Turn on COOL function from remote or control panel.
	Low or no water in tank, When COOL is selected.	Refill water tank.
	Damaged pump or Calcium deposits on blower.	contact service center.
odour omission	New Unit	When the unit is used for the first time, the cooling media will have an odour , which will dissipate within a week of initial use.
	old unit	There may be an algae issue replace the cooling media. contact service centre.

# Cleaning & Maintenance

The appliance is supplied with the Honeycomb cooling media.

The cooling frequency depends on the local air and water conditions. In areas where the mineral content of water is high, mineral deposits may build up on the honeycomb cooling media and restrict air flow. draining the water reservoir and refilling with fresh water at least once a week will help .Media should be removed and washed under fresh water. The media should be cleaned every two months or sooner, depending on your needs.

Do not run the unit in COOL mode with stale water in tank. It is recommended to empty the tank and refill with fresh water. if the water has been standing in the tank for an extended period of time.

For the best results, allow the honeycomb cooling media to dry after each use by turning the unit off.

to change the honeycomb, remove the hand screws which hold the side pane! Remove the honeycomb holder and screw back the panel to the unit.

Fig-1

NOTE :

this unit is supplied with three honeycomb cooling media located on the back & two sides. the removal procedure for all the media as explained above .
